- No need for station closures

Proud to serve GM Fire Service

For a number of projects, Aspull is proud to have been nominated 'first choice supplier' of electrical installation and maintenance services for Greater Manchester Fire and Rescue.

From a basic re-wire to a brand new, total fit in line with internal building alterations, we have been called out to fire stations across the county, from Atherton to Hindley, Hollins to Horwich.

We've fitted integrated, automated systems for lighting and doors, public address/loudspeaker systems, even the very latest lightning protection – all without disruption to the day (or night) running of the stations.

"It's reassuring to have Aspull on board. People's lives depend upon us providing a rapid, reliable service. Which is exactly what we get from Aspull ."
