Key Facts

- Start-to-finish package
- Total service
- On schedule, on budget

Preston HQ gets new spark

In line with key Government agendas, registered charity 'Recycling Lives', offers a wealth of hope and inspiration to the disadvantaged without work or homes and to 'social entrepreneurs' seeking to do good for their local communities.

Aspull was commissioned to provide a full electrical installation for the charity's headquarters in Preston – a purpose-built facility, which provides industrial space for a range of recycling activities, temporary accommodation, plus skills training provision for the long-term unemployed.

The project required a complete, new-build mains system, distribution containment, IT and telecommunications infrastructure, TV and satellite distribution network and emergency lighting.

"A massively welcome contribution all round."
